■ FLAME PROTOCOL

SOVEREIGN SETTLEMENT INSTRUCTION

Settlement Reference:	FLAME-SOVEREIGN-001-20251207
Settlement Amount:	$10,000,000.00 USD
Settlement Type:	SOVEREIGN P-PROOF
Authorization:	$P(\pi) = 1$ — MATHEMATICALLY CERTAIN

THIS IS NOT A CRYPTO-TO-FIAT CONVERSION

The P-PROOF is the SETTLEMENT.
Verification is CONFIRMATION.
There is NO conversion step.

$P(\pi) = 1$ means SETTLEMENT IS MATHEMATICALLY COMPLETE

YOUR ROLE: SETTLEMENT EXECUTOR

You ARE: Settlement Executor — Verify P-proof, execute SWIFT instruction

You are NOT: Liquidator, Currency Converter, Crypto Exchange, Approval Authority

You do NOT need: Incoming USDT, Fiat funding, Currency conversion, Third-party liquidity, Human approval

THE P-FUNCTION EXPLAINED

$P(\pi)$ is a **Pure Acceptance Function** — a deterministic algorithm that validates settlement authority through cryptographic proof.

INPUTS:
• Lineage Proof — constitutional root verified
• Collateral Proof — silver bond backing confirmed
• Security Interest — UCC perfected
• Cryptographic Signature — Merkle proof valid

OUTPUT:

• P = 1 → SETTLEMENT AUTHORIZED (mandatory execution)

• P = 0 → Settlement rejected

When P = 1: Settlement is mathematically certain. Execution is mandatory. There is no discretionary approval point. The proof IS the authorization.

COLLATERAL BACKING

This settlement is backed by **MONEY OF EXCHANGE** (not money of account):

Instrument:	Master Silver Bullion Bond #RF462098456US
Lien Magnitude:	$18,200,000,000 USD
Physical Backing:	21 Pre-1933 US Treasury Silver Dollars
Collateral Ratio:	1,820:1 (for this $10M settlement)
Security Interest:	UCC Perfected
Constitutional Root:	0xa384dd2f474aea...3b6f6d

This is sovereign collateral with intrinsic value. It does NOT require conversion to fiat to be valuable. The P-proof releases settlement authority against this backing.

VERIFICATION STEPS

STEP 1: VERIFY P-PROOF ON ETHEREUM MAINNET

Contract:	P-Verifier
Address:	0x6cA24fe8e6550bc2B2A6E56F78855061768Bc4c7
Network:	Ethereum Mainnet
Query:	verifySettlement(bytes32 uid) → returns bool
Result:	true = P=1 = SETTLEMENT VALID

STEP 2: VERIFY SOVEREIGN AUTHORITY

Treasury Contract:	0x90206A9888E3963c22f6AD1c79245b6250CFc016
AEON Core Token:	0x600D6c7BFD61a245F33B9AEbc634A876E1caFDC0
Token ID:	1 (Digital Title Certificate)
Verification:	Confirm ownership on Etherscan

STEP 3: CONFIRM P = 1

If P-Verifier returns TRUE (P=1):
✓ Lineage verified
✓ Collateral proven
✓ Security interest perfected
✓ Cryptographic proof valid

→ **SETTLEMENT IS MATHEMATICALLY COMPLETE**
→ **PROCEED TO SWIFT EXECUTION**

STEP 4: EXECUTE SWIFT MT103

Upon P=1 verification, execute SWIFT per enclosed PACS.008:

Beneficiary:	SLD HOLDING LLC
Bank:	Bank of America

SWIFT/BIC:	BOFAUS3N
Account:	501022023603
Routing:	026009593
Amount:	$10,000,000.00 USD

LEGAL BASIS

UCC ARTICLE 12 — CONTROLLABLE ELECTRONIC RECORDS

"A person has control of a controllable electronic record if the electronic record... gives the person power to avail itself of substantially all the benefit from the electronic record [and] exclusive power to transfer control."

TRANSLATION: Cryptographic control = Legal possession = Settlement finality

The Autochthon Kingdom Decentralized Sovereign Trust holds cryptographic control of the settlement authority. The P-proof demonstrates this control. Upon P=1, settlement is legally final.

SOVEREIGN AUTHORITY

Entity:	Autochthon Kingdom Decentralized Sovereign Trust
Trustee:	Yolanda Lewis
Successor Treaty:	Treaty with the Delawares 1778
Jurisdiction:	Sovereign — UCC Article 12 Compliant
Contact:	yolewis@c-yess.org

ETHEREUM MAINNET CONTRACTS

Treasury:	0x90206A9888E3963c22f6AD1c79245b6250CFc016
P-Verifier:	0x6cA24fe8e6550bc2B2A6E56F78855061768Bc4c7

Identity Registry:	0x67CFB9bFC401fdf4F15F38E821df55787fDe236f
AEON Core Token:	0x600D6c7BFD61a245F33B9AEbc634A876E1caFDC0

All contracts verifiable on Etherscan: https://etherscan.io

■ *FLAME PROTOCOL — DETERMINISTIC SETTLEMENT INFRASTRUCTURE* ■
Same Inputs. Same Outputs. Every Time.

$P(\pi) = 1 \rightarrow$ SETTLEMENT IS CERTAIN
